GitHub

The screenshot shows a web browser window displaying the GitHub profile of a user named 'Nilapine'. The browser's address bar shows 'github.com/Nilapine'. The page has a dark header with navigation links: 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. Below the header, the user's profile is shown with a circular avatar containing a green GitHub logo, the name 'Nilapine', an 'Edit profile' button, and a note 'Joined 3 days ago'. To the right of the profile, the 'Overview' tab is selected, showing 'Popular repositories' (empty) and a message: 'You don't have any public repositories yet.' Below this, a '1 contribution in the last year' section features a contribution graph. The graph is a calendar grid from September to September, with a single dark green square on the last day of September. A legend indicates 'Less' (light green) and 'More' (dark green) contributions. A 'Show all' button is at the bottom right of the graph area. The browser's taskbar at the bottom shows open files: 'Pertemuan Mingg...pdf' and 'Praktikum 2.pdf', and the system clock shows '16:14'.

Less More

This is your contribution graph. Your first square is for joining GitHub and you'll earn more as you make additional contributions. More contributions means a darker green square for that day. Over time, your chart might start looking something like this.

Show all
